**CAMBER (FRONT/REAR)**

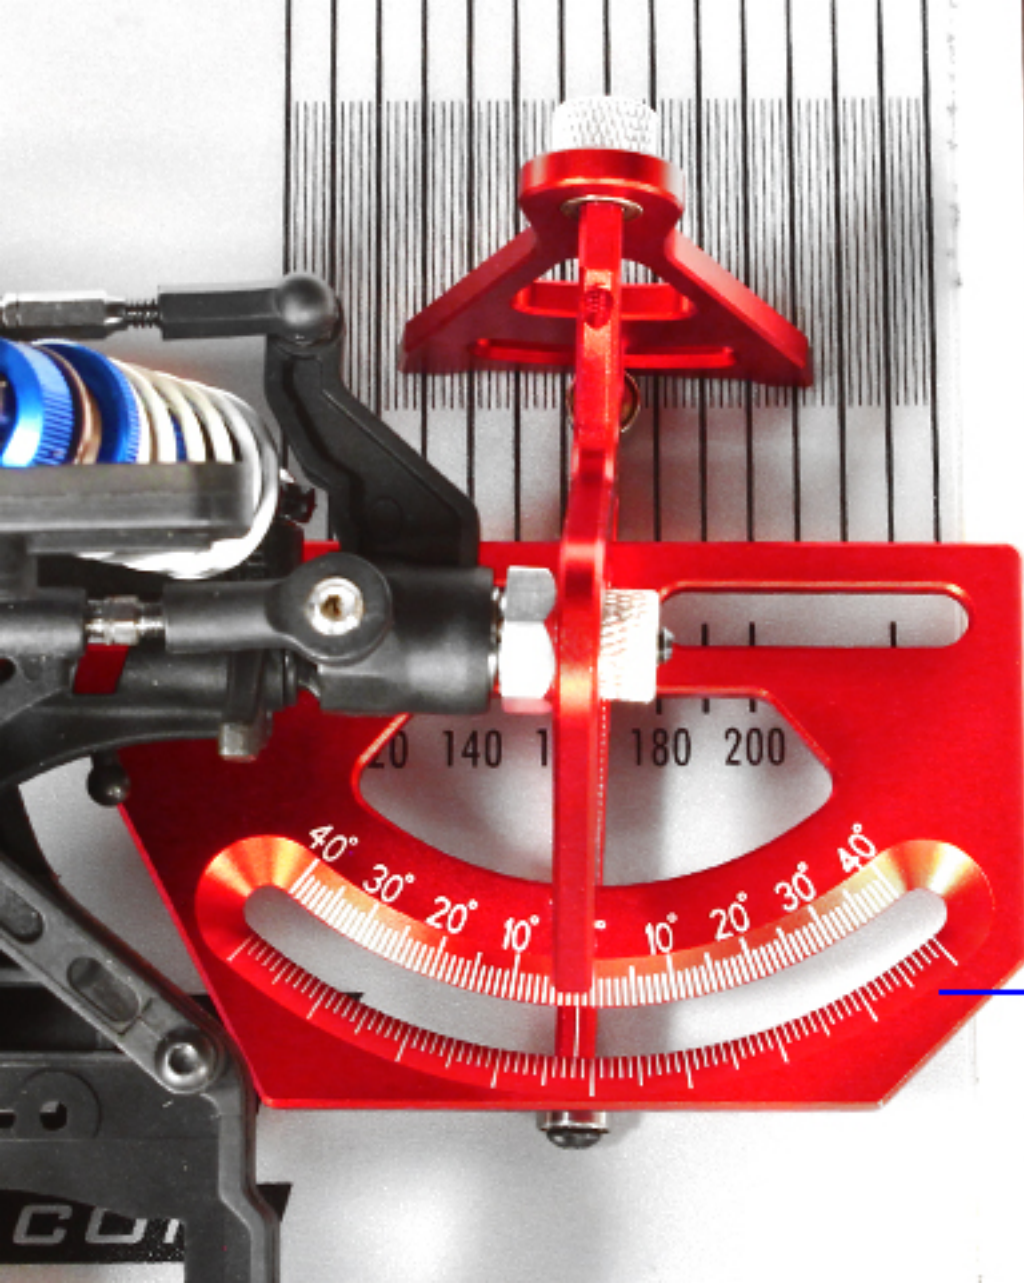

The front/rear camber angle of your vehicle will be shown on the lower gauge.

## FRONT CASTER

Move the pointer so that it is inline with the upper and lower kingpins; the front caster angle will be shown on the gauge.

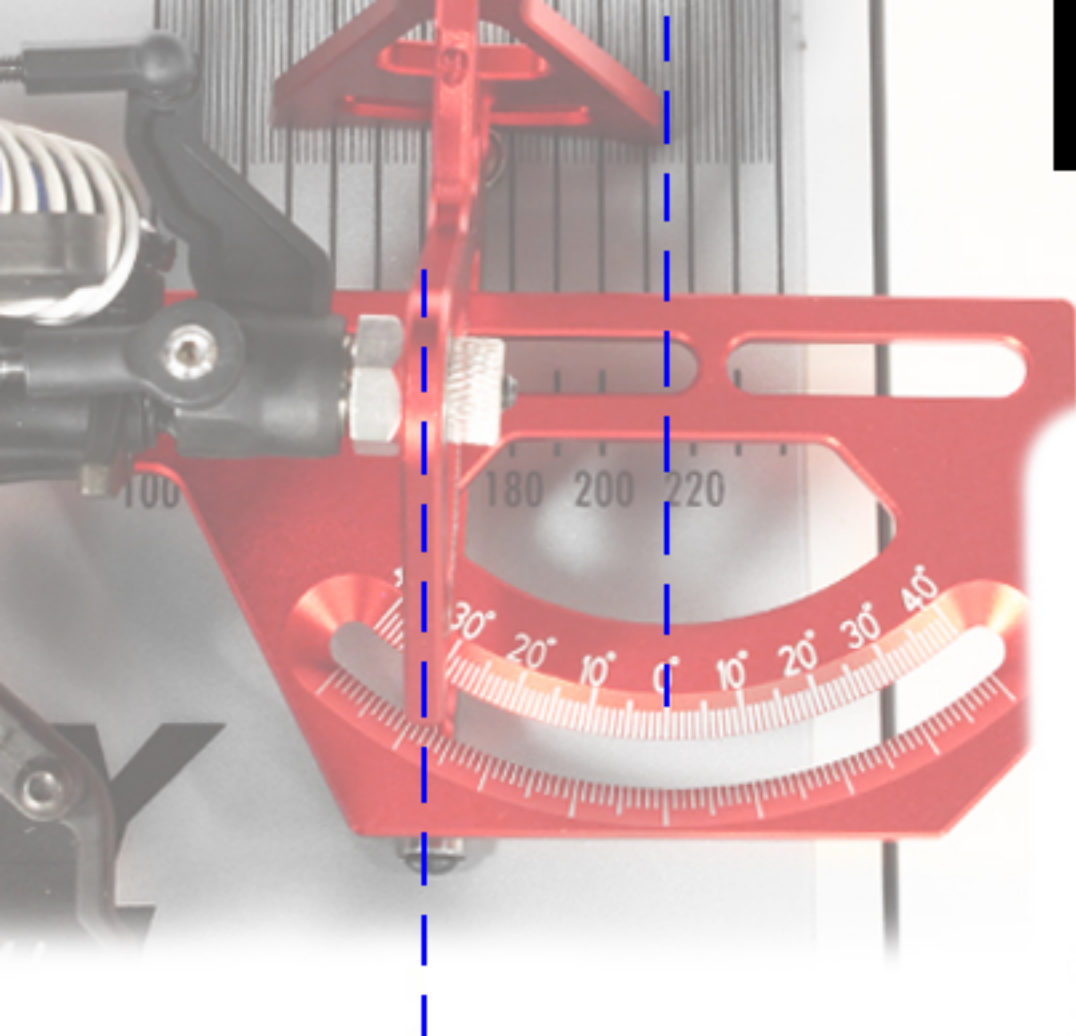

## TOE-IN/TOE-OUT

The toe plate will show you the amount of toe-in or toe-out depending on the direction of the angle shown on the gauge.

Make sure you slide the toe plate so that the axle of your vehicle is above 0-degrees.

**Plate MUST BE  
lined up with  
0-degree mark!**

**TOE (WRONG WAY!)**

Toe plate is not positioned correctly because the axle of the vehicle is not inline with the 0-degree marking on the toe plate.
