

It has come to our attention that there were some packages of #C28432 and #C28433 sold between 09/2018 and 10/2018 had the sway bar rods swapped. If you purchased **both #C28432 and #C28433** you will have the correct parts to install the sway bars; simply swap the longer sway bar rod to the rear and use the shorter sway bar rod up front, as shown in the photos below.

****If you only purchased #C28432 OR #C28433 only (not both) from our website and have the wrong sway bar rod, please contact us through our help desk for an exchange (only applies to products purchased directly from Integy.com between 09/2018 to 10/2018, proof of purchase required).*
